## PROFESSIONAL DEVELOPMENT for MEDIA EDUCATORS

October 20th~22nd, 2006

*on Galiano Island*

**After more than 11 years of teaching over 3000 young students,  
we've learned a few things about teaching video and film  
production to youth.**

This weekend is primarily designed for - though not limited to - teachers interested in teaching media literacy, script writing, and video production. Our curriculum is tailored to the specific needs of participants. The emphasis is on process rather than product, and includes discussion of teaching techniques proven effective in training youth in video production. This is the 11th year this popular intensive program has been offered. Space is limited.

### **Workshops include:**

~Production, Pre- & Post-production  
~Sony DV camera, lighting, in-camera editing, Adobe Premier Pro non-linear editing, Flash, After Effects, sound recording, scriptwriting, media literacy

### **Groups will participate in:**

~discussions of teaching techniques for media production  
~advice on equipment purchases  
~networking with other media educators.

**Learn by doing,  
with guidance from leading industry professionals**
